LU PEI-YUN CHUNG

UX, UI, and Product Designer

SERVICES

What I do through my design process:

- Create design concepts and drawing down initial ideas with strategic thinking to determine the best solution for the product.
- Identify and suggest product improvements to meet needs and changing from customer preferences.
- Set design requirements based on information from internal teams and marketing user research.
- Perform research and conduct usability testing on product technologies and structures to implement into design concepts.
- Coordinate with other design team members to ensure consistent and accurate communication.
- Present product design ideas to cross-functional teams and senior leadership.
- Stay up to date on current industry trends and market conditions.

What I bring with my design solution:

- Proven experience in all phases of the design process including user research, wireframe, prototyping, visual design, interaction design, and usability testing.
- Create mobile-friendly and innovative products aligning to design principle and technical practice for multi-platform: desktop, iPad, mobile, iOS or Android.
- Excellent attention to detail, high quality, and aesthetic design.
- A well-rounded portfolio of client work, demonstrating a strong understanding of client objectives, feature roadmap, and market segment.
- An intuitive eye and or customer needs beyond the obvious.
- Ability to proactively collect and interpret qualitative and quantitative feedback.
- Provide assistance of coding skills to product engineers when needed.
- Keep passion, vision, inspiration, and judgment about UX and UI trends.
- Recommend new tools and technologies by staying abreast of the latest trends and techniques.
